

NWN Newsletter #7

February 2024

NWN meets nightly at 22:00 on 3567 Kc

Hello gang,

Winter condx are still in full swing. We've had some amazingly clear nights peppered with some of the worst condx I've seen to date.

Special thanks to Jim K6APW and Rob K6YR for QNG a few nights last month. It wasn't for those guys we'd probably not have a net those nights.

Still have plans to get on 160m. I've had a few responses from you expressing interest in meeting there as a backup plan for nights when 80m just won't happen. It'll likely be 1818 Kc as that's where other nets have landed for the same reason. I haven't been on 160 due to property constraints but a non-resonant base tuned doublet may be the answer. More to come on this as spring draws closer.

If anyone is interested in becoming an NCS, please contact me - Patrick NG7I sbus1313@gmail.com and I'll get you on the schedule.

...

If you're not in the Northwest, just think of NWN as "Net Without a Name" -hi

Best 73,
Patrick NG7I
