

NWN Newsletter #14

January 2025

NWN meets nightly at 22:00 Pacific on 3560 Kc

Hello gang, Happy New Year!

It's good to be back! Thank you Scott and Dan for running NWN while I was gone!

Updates to the website will be delayed a few days.

Carole is working with the server admin to get us back in.

I used the [Utah SDR](#) to listen for QNI's the other night when the band was long, and I was able to hear everyone effortlessly (Thanks Randy!). Had I remained rig-bound I would have heard maybe two of you. The only problem with using an SDR is the 3-5 second delay, so timely AF muting of your computer when you transmit will be a needful skill to prevent chaos between your rig's AF and the SDR's.

The [Kiwi SDR](#) network is in the US, Europe, and Australia so you can use it to hear your propagation on any band in those regions.

If anyone is interested in becoming an NCS, please contact me - Patrick NG7I sbus1313@gmail.com and I'll see about getting you on the schedule.

...

If you're not in the Northwest, just think of NWN as "Net Without a Name" -hi

Best 73,
Patrick NG7I
