Stats: QNI's were lower this month than last, by 6 check-ins, with QTC's down by 11.

Condx were horrid again most of the month. However the last week or so hasn't required QRO or SDR to make things happen, so that's a positive sign.

Randy WB4SPB and I hit **every** NWN session in January. Our best turnout was 10 on Jan 10th. Our monthly average was 7.61 QNI's per night, down from 7.81 the month before. Stats should improve with band condx. Hopefully it won't require getting creative to make things work soon enough.

If anyone is interested in becoming an NCS, please contact me - Patrick NG7I sbus1313@gmail.com and I'll see about getting you on the schedule. *If you want to try it, just ask.* The existing guys might just let you have their slot! If it turns out to be too much then we'll take it back no problems.

...

If you're not in the Northwest, just think of NWN as "Net Without a Name" -hi

Best 73,
Patrick NG7I
